BLOOD PRESSURE MONITOR

PARR detects pulse arrhythmia, including Atrial Fibrillation (AFib), Premature Contractions (PC), Tachycardia (TACH), and Bradycardia (BRAD).

Detects

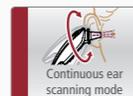

- AFib** Atrial Fibrillation
- PC** Premature Contraction
- TACH** Tachycardia
- BRAD** Bradycardia
- ARR** Non type - specific arrhythmia

THERMOMETER

The patented "PLUG & SECURE" probe cover offers an easy and accurate ear temperature measurement.

The continuous ear scanning mode views the entire ear canal and looks for the highest temperature that can be detected.

The non-contact temple forehead thermometer provides a consistent and longer distance temperature measurement.

NEBULIZER

The VAT technology allows users to adjust different levels of nebulization rate at consistent particle size.

Tailor-made, patented super mini pump technology.

The hygienic "2in1 Cup" design ensures you easy cleaning, assembly and disassembly.

TECHNOLOGIES

Since 1988, Rossmax is committed to strive for the best technologies in each business field.

Providing value for the customer's specific need, is the key driver in inventing patented solutions. Rossmax does not compromise in fulfilling the highest quality standards and proofing the results through outstanding clinical validations.
